RE: Ally Technology Consulting

To Whom It May Concern:

Gravenstein Union School District contracted the services of Ally Technology Consulting in July of 2017 to install networking equipment for the Gravenstein Elementary School and Hillcrest Middle School campuses. Chris Moghtaderi worked extremely hard on the District's behalf to ensure the best possible pricing on the equipment. The equipment was installed and configured when the school was closed and the staff could not be happier with the result. The network equipment has performed very well and questions or requests regarding the network have been dealt with promptly to the satisfaction of the District. The District is extremely satisfied with the network equipment, installation and follow up support.

Sincerely,

Jennifer Schwinn, Superintendent
